I am a frontend engineer with an appreciable amount of experience building UI for web applications, most comfortable with web technologies like vanilla javascript, React, Angular, HTML and CSS.

EXPERIENCE

Terragon Group, Lagos, Nigeria — *Frontend Engineer*
Sept 2021 - Till Date

Reward Engine and Terragon CDP Platform

Worked on the application dashboard and with a team of engineers that developed a bulk SMS platform that schedules campaigns to run and do targeted marketing for millions of users.

Furthermore, I worked on a reward engine authentication flow to allow a new user to register, signup, login, and be able to reset passwords too and working on the dashboard too with nice features

Also responsible for the merger of both platforms to become one. Technologies used are Angular as the core javascript technology, with Angular material and css for styling.

PROJECTS

github, Achschools, countriesapp

TECHNOLOGIES

JavaScript

React

Angular

Typescript

HTML

CSS

Bootstrap

Postman

Git

Slack

Jira
